John Wang

has successfully completed the online, non-credit Specialization

Generative AI SQL Database Specialist with ChatGPT

This certifies that the holder has mastered the integration of generative AI with SQL database systems, demonstrating advanced proficiency in using AI to design robust database schemas, generate complex SQL queries through natural language, and create powerful data visualizations without programming. The recipient can implement cutting-edge techniques including database simulation, query optimization, and automated analysis—positioning them as an innovation leader capable of transforming how organizations interact with their data through the strategic application of AI and SQL technologies.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
